I prodotti a base elastomero di poliuretano hanno oramai un diffusissimo impiego nei più svariati settori ed in particolare per gli stampisti nella lavorazione della lamiera.

Le nostre lastre quadrate e rotonde possono essere impiegate quali: elementi elastici, punzoni e matrici di forgiatura, imbutitura e tranciatura, bombatura di corpi cavi e pentolami, respingenti e sospensioni.

Oltre i noti vantaggi di silenziosità e praticità, si eliminano in gran parte le spese per gli utensili e le attrezzature tradizionali.

The products at basis of elastomer of polyurethane have by this time a very large use in the various fields and particularly for the diesinkers in the sheet working.

Our square and round plates can be used as elastic elements, punches and dies for forging, drawing, blanking and crowing of hollow bodies and kettles, buffers and suspensions.

In addition to the well-known advantages of silentness and practicality, you can avoid a lot of expenses for the traditional tools and equipments.
